

Celebrating Excellence in Retina Research

ORIGINALLY PUBLISHED JAN 16, 2025 | INFOCUS INSIGHTS

At InFocus Clinical Research, we are privileged to work alongside talented study coordinators around the world. This January 2025 feature recognizes the Top Study Coordinators in Retina Clinical Research for 2024, nominated by InFocus clinical research associates (CRAs) for their dedication, expertise, and collaboration with our monitors.

Brad Doerschuk, InFocus President & CEO, recognized coordinators as a vital force in advancing clinical research and supporting the timely development of novel therapeutics. He emphasized their importance to InFocus's shared mission to address vision-threatening disorders.

We are proud to recognize these 11 study coordinators for their contributions to retinal research and patient care.

Angela Callaghan
Bergstrom Eye Research | US

Francisco Angueira
Retina Consultants of Texas | US

Abby Sharp
University of Michigan | US

Sarah Sneddon
Albury Eye Clinic | Australia

Danika Corless
Retina Specialists Victoria | Australia
